

Fortra Approvals Maintenance

Settings:

1. In Setup -> Organization-Wide Addresses, there is an email that will be used for no-reply emails and general errors regarding approvals. It needs to be verified to work.
 - a. Currently, it is set to "aaron.broom@coastalcloud.us" until we can verify "psi-salesforce-test@fortra.com" (or another email if preferred).
2. In Setup -> Process Automation Settings, you will populate the second box with the verified email used above.

Approval Checkbox Fields (this section is only visible for System Admins):

1. Perpetual Pricing Discount Approval
 - True if any Quote Lines are Perpetual and discounted
2. Subscription Pricing Discount Approval
 - True if any Quote Lines are Subscription and discounted
3. Services Discount Approval
 - True if any Quote Lines are Services and discounted
4. Maintenance Discount Approval
 - True if any Quote Lines are New/Renewal Maintenance and discounted
5. Signed Quote Approval
 - True if 'Signed' is selected for 'Signed Quote?' field
6. Unsigned Quote Approval
 - True if 'Unsigned' is selected for 'Signed Quote?' field
7. Credit Renewal Approval
 - True if 'Credit Renewal ARR' is True
8. Displaced ARR Approval
 - True if 'Displaced ARR' is greater than 0
 - ***Will eventually be updated to be if 'Quote Displaced ARR' is greater than 0**
9. Legal Support Approval
 - True if 'Request Legal Support' is true
10. License Extension Approval
 - True if 'Temp License Key Extension' is true
11. MYCAP Approval
 - True if 'Mycap' is true
12. Net Terms Approval
 - True if 'Net Terms' picklist is not 'Net 30'
13. Renewal ARR Approval
 - True if 'Quote Type' is Renewal and 'Discount Renewal ARR' is true
14. Renewal Cancellation Approval
 - True if 'Quote Type' is Cancellation or 'Quote Name' contains cancellation
15. Approval Rejected checkbox
 - True if ANY of the approvers Reject ANY of the approval steps

Fields affecting the checkbox fields:

- Opens up other fields (Discount Renewal ARR Request and Discount Renewal ARR Justification)
- 17. Discount Renewal ARR Request
 - Input discount amount being requested
 - Will be in email
- 18. Discount Renewal ARR Justification
 - Used in email to show approver why Renewal ARR needs to be discounted

Order of Flows:

*Anything with “Approval Criteria” in the flow name is the flow containing the conditions to trigger the approval checkbox and the approval flow

1. Main Approvals Flow - Screen
2. Perpetual License Discounts - Approval Criteria
OR
Fortra | Quote | Tech Perpetual License Discounts - Approval Criteria
3. Fortra | Quote | Cyber Subscription Pricing Discounts - Approval Criteria
OR
Fortra | Quote | Tech Subscription Pricing Discounts - Approval Criteria
4. Fortra | Quote | Cyber Services Discounts - Approval Criteria
OR
Fortra | Quote | Tech Services Discounts - Approval Criteria
5. Cyber Maintenance Discounts - Approval Criteria
OR
Fortra | Quote | Tech Maintenance Discounts - Approval Criteria
6. Fortra | Quote | Unsigned Quote - Approval Criteria
7. Fortra | Quote | Signed Quote - Approval Criteria
8. Fortra | Quote | Displaced ARR - Approval Criteria
9. Fortra | Quote | Legal Support - Approval Criteria
10. Fortra | Quote | License Key Extension - Approval Criteria
11. Fortra | Quote | Discount Renewal ARR - Approval Criteria
12. Fortra | Quote | Renewal Recognition - Approval Criteria
13. Fortra | Quote | Renewal Cancellation - Approval Criteria
14. Fortra | Quote | MYCAP Sale - Approval Criteria
15. Fortra | Quote | Net Terms - Approval Criteria
16. Fortra | Quote | Approvals
17. Approval Template - Decision
18. Fortra | Quote | Check Approval Rejected Checkbox
19. Approvals: Update Quote Stage

Inside the Megaflow (Fortra | Quote | Approvals):

1. Start:
 - a. This node contains the conditions that will trigger this flow
 - b. If ANY of the approval checkboxes (in the Approval section on the Quote layout) are checked AND changed to True, it will trigger the flow.
2. Cyber or Tech:
 - a. Next is distinguishing between a Cyber or Tech approval process since there are different approvers for each.
3. Approval Segments:
 - a. The first decision node in each “segment” will determine if that specific checkbox has been triggered”. It is also the place to find what approval you are looking at in the flow.
 - b. If it is triggered, it goes down to the first stage, sends the email, and then runs the Approval Template flow where it prompts and waits for the Approver to choose “Approve” or “Reject” on the Approvals tab on the Quote object.
 - i. If approver responds with “Approve”, then the flow will go down to the next node of approver/s (if applicable) until either an Approver Rejects or there are no more approvals for that segment.
 - ii. If approver responds with “Reject”, the segment will immediately stop and run the “Check Approval Rejected Checkbox” flow
 1. This flow is only there to log ANY Rejected approvals so that it can know to check the respective checkbox and move the quote status to Rejected at the end of the flow.
4. End:
 - a. After the flow has gone through each triggered approval, there is a node at the very end of the flow that will run a flow called “Update Quote Stage”, which checks if the “Approval Rejected Checkbox” on the Quote is True.
 - i. This checkbox will have been updated if any approvers chose Reject on their approval.
 - b. Afterwards, it moves the Quote Status to “Approved” if none of the Approvers chose Reject or “Rejected” if any of the Approvers chose Reject.
